

IRON CROSS QUICK REFERENCE

CONTROL BUTTONS

THE SCREEN:

The largest part of the screen is devoted to the main combat screen (1). All the action takes place here. Clicking on a unit or terrain feature will pause the action and give information about the object. Note: When you right click on an object you center the screen on this object. The upper right part of the screen is an

overhead map (2) that is used to move your point of view from one part of the map to another. Immediately below that is a graphical list of existing and lost units (3). This area also shows how many artillery and air strikes you have remaining. Near the bottom right are 6 buttons that control various functions in combat (4). The flags in the lower right (5) are a graphical representation of the current victory status. The side with the most flags at the end of the scenario wins.

INSTALLING IRON CROSS

Iron Cross requires 22MB of hard drive space and 4MB of RAM.

1. Insert Iron Cross Disk #1 into your computer's floppy drive. Then, type the letter of the drive and a colon (i.e. **A:** or **B:**) and press **Enter**.
2. Type **INSTALL** then press **Enter**. NOTE: If you are unsure about any of your installation choices, just press return to accept the default settings, and you can always rerun the Install program and change your settings.
3. When the Install program begins, it will ask for a path name. You may use the default (C:\IC) by typing **Y**, or create your own. If the directory you choose does not exist, type **Y** to create it.
4. The Install program will begin installing Iron Cross to your hard drive. The install program will ask you for the next disk when ready.
5. Next, the install program will ask you for your speech and music configuration. It will display an asterisk (*) next to a detected sound device. Select the desired speech and music configuration for your computer.
6. Next, the install program will ask you for your video configuration. It will display an asterisk (*) next to a detected video device. Select the desired video configuration for your computer. If your video card is not listed, choose VESA and load the VESA driver provided by the video card manufacturer.
7. The Install program will display the current configuration. Type **D** if the current settings match your desired configuration.
8. When installation is completed, the program will exit into the subdirectory in which Iron Cross was installed. Type **IC** then press **Enter** to begin playing. To change the User Preferences, go to the IC directory and type **Install**.

If there are any errors, the Install program will report them. If you have any questions about installing Iron Cross, contact our Technical Support at (818) 889-5650 from 9am-12 noon or from 2pm-5pm Mon-Fri PST.

A mouse is necessary to play Iron Cross.
